

Michael Clausen studied mathematics, physics, and computer science. He received the Dr. rer. nat. degree (summa cum laude) in Mathematics from the University of Bayreuth, Germany, in 1979 and the Dr. rer. nat. habil. degree in Computer Science from the Technical University of Karlsruhe, Germany, in 1989. He held postdoctoral positions at the universities of Bayreuth, Zurich, and Karlsruhe. Since 1989, Dr. Clausen has been a professor for Computer Science at the University of Bonn, Germany, where he heads the research group on Communication Systems and Algorithms. His current research interests cover applications of computer algebra, complexity theory, combinatorics, and digital signal processing. Special research topics include computational representation theory of groups, audio signal processing, content-based retrieval in multimedia documents, and shape matching. He is coauthor of the books “Fast Fourier Transforms” (Mannheim: Bibliographisches Institut, 1993) and “Algebraic Complexity Theory” (Heidelberg: Grundlehren der mathematischen Wissenschaften, Vol. 315, Springer, 1997). Dr. Clausen is a member of the DMV and Fellow of the Institute of Combinatorics and its Applications.
